AUSTRALIAN NATIONAL GUIDELINES FOR THE MANAGEMENT OF HEALTHCARE WORKERS LIVING WITH BLOOD BORNE VIRUSES AND HEALTHCARE WORKERS WHO PERFORM EXPOSURE PRONE PROCEDURES AT RISK OF EXPOSURE TO BLOOD BORNE VIRUSES

The Communicable Diseases Network Australia (CDNA) has published these guidelines. The following is a summary of the requirements in the CDNA guidelines:

Healthcare workers who perform exposure prone procedures (EPPs) must take reasonable steps to know their blood-borne virus (BBV) status and should be tested for BBVs at least once every three years. They are also expected to:

- have appropriate and timely testing and follow up care after a potential occupational exposure associated with a risk of BBV acquisition
- have appropriate testing and follow up care after potential nonoccupational exposure, with testing frequency related to risk factors for virus acquisition
- cease performing all EPPs if diagnosed with a BBV until the criteria in the guidelines are met, and
- confirm that they comply with these guidelines when applying for renewal of registration if requested by their board.

Practitioners who are living with a blood-borne virus and who perform exposureprone procedures have additional requirements. They are expected to:

- be under the ongoing care of a treating doctor with relevant expertise
- comply with prescribed treatment
- have ongoing viral load monitoring at the appointed times
- not perform EPPs if particular viral load or viral clearance criteria are not met (see detailed information in the guidelines according to the specific BBV)
- seek advice regarding any change in health condition that may affect their fitness to practise or impair their health
- release monitoring information to the treating doctor
- if required, release de-identified information to the relevant area of the jurisdictional health department/Expert Advisory Committee, and
- if required, release health monitoring information to a designated person in their workplace in the event of a potential exposure incident to assess the requirement for further public health action.
