To Whom It May Concern:

Regarding proposed changes to intern training.

I am a doctor trained in NSW. I completed my intern year last year.

I wish to express my opposition to the proposed change in intern training from a term of emergency medicine to a term of "emergency medical care" which could mean rural GP setting with some exposure to emergency medicine.

I believe a placement an emergency medicine department in a hospital is essential in producing skilled doctors at the end of intern year. I think that the change to a GP setting would mean many junior doctors get an inferior experience and this would result in inferior skill levels

Thank you
Yours sincerely
Dru Haywood
