

## Petition to continue Cosmetic Nurse Injectors to treat patients with live video consultation

Hello, my name is [REDACTED] I am a cosmetic nurse injector who is trained to cosmetically treat patients with anti-wrinkle and dermal fillers. I have worked in the cosmetic industry for the last 18 years to help maintain my patient's youthfulness and feel good about themselves. I am a Division 1 Registered Nurse with an extensive background in other areas of nursing who has chosen to focus on Cosmetic Medicine as my specialty.

I have been working in this industry with **anti-aging Cosmetic and Laser** who provide regular injector training both internally and with Galderma and Allergan as well as medical support for my patients via a dual and thorough consultation between doctor or nurse practitioner and myself. **anti-aging** and I have a thorough consultation process in place whereby patient education and safety are paramount - current and past medical history is taken, alternative treatments and pre and post care advice is explained prior to consent being obtained. I meet and train with **anti-aging** doctors and nurse practitioners on a monthly basis at group training sessions, events and one on one training sessions. I find this to be a great method as we all get to know each other's capabilities and experience which creates an even better working relationship.

Currently there is a motion in process to try and change the way cosmetic injectables are administered, focusing on the consultation phase. They want to make the doctors or nurse practitioners consultation face-to-face which will make the current real time video consultation unacceptable.

If the proposed changes are successful, we will not be able to work as we currently do using real time video with dual consultation between myself, doctor or nurse practitioner at this and other clinics.

What we are hoping to achieve through this petition is to let AHPRA (Health Practitioners Board) to see that the dual consultation process we at anti-aging currently employ is good medical practice and that the needs of our patients are well and truly met and exceeded. If you have had a good experience with the process we have undertaken, we are encouraging as many patients to write in to let them know of these, how your medical needs have been met and if you feel that you are taken care of. If you have had your needs exceeded, please do write in to support the current method.

We support well trained cosmetic nurse injectors to continue in their field of expertise with their existing focus on patient safety, outcomes and education along with the dual consultation with the anti-aging cosmetic doctor or nurse practitioner via real time video here at:

8/5/15			Please retain this service within the beauty salon.	
8/5			I feel so comfortable & confident with [REDACTED] & would dread seeing anybody else. I couldn't imagine finding this service elsewhere.	
18/5			consultative & conservative professional & very skilled the treatment(s) (injections) I have received for the last 5 years have been outstanding	
11.5			very comfortable with [REDACTED]: consultatively, maintenance of hygiene, ability & skill. Wish more people were as professional.	
11/5			Having initially visited a 'registered practitioner' I felt that I was being pushed into whatever treatment	

he was working. I felt → here for years  
it was more a 'sales & and everything  
push.' I have been coming is fantastic.
