Subject: FW: Silencing Doctors right to free speech
Date: Thursday, 2 August 2018 2:38:53 PM

It is with great concern that I read of your current, and soon to be upgraded, application of rules that prohibit free speech of those forced to be members so that they may practice. Your role is to ensure medical practice is carried out to the health benefit of the patient, by qualified and diligent qualified people. Don't overstep the mark by assuming you, that small group of you that assume a role of administration, have greater powers than the community expects.

This country is being stretched to its limits on controls that are being imposed.

Don't become one of those controlling bodies, otherwise the integrity of your profession will be judged.

(Ref. Dr van Gend)
