---

A few points for consideration:

1. Should paediatrics and obstetrics and gynaecology be added to the list of disciplines in the fourth dot point under item 2 in Specific requirements as some rotations include experience in them?
2. Is there a role for PMCs to confirm that all rotations undertaken by the intern have been accredited under item 3 in Specific requirements?
3. Should there be a time limit to the number of years in exceptional circumstances to allow completion of internship?

Lou Landau.
