I am writing this letter in response to the Public consultation in regards to the following changes proposed. Please note the following points in particular from the Medical Board Public Consultation Paper.

Page 56:

2.5 Other than for minor procedures that do not involve cutting beneath the skin, there should be a cooling off period between the patient giving informed consent and the procedure of at least seven days.

Page 58:

7.2 Medical practitioners must not prescribe schedule 4 (prescription only) cosmetic injectable unless they have had a face-to-face consultation with the patient. A face-to-face consultation is required for each course of injections. Remote prescribing (for example, by phone, email, or video conferencing) of cosmetic injectable is not appropriate

I have been a client of **Marco Andrea Peruzzo** RN DIV 1 for a number of years at this clinic, If the above proposed changes are implemented Marco will not be able to work as he currently do with the dual consultation with nurse and doctor or nurse practitioner using real time video at **CLINICALASE, 220 Elgin Street, Carlton**.

I would be forced to change clinic or to find another practitioner. I have built a trusting relationship with Marco over time and if those changes are implemented I would not be able to come to this clinic of which I am a long term client and I find a comfortable place for all my cosmetic needs

Please add a comment

Informed consent was read & signed.

Marco discussed alternatives to what I actually wanted & gave me great advice.

With anti aging nurse I was given more information & options & the same level of expertise then when I attended plastic/dermatologist venue, where I saw a nurse & not a Doctor.

Marco Discusses complications & side effects & how to manage

Marco has always quizzed me about what I am using medicatively wise. Better than the times a GP used to look after me. I think things are in place to take great care of me as is [redacted]

I have been thoroughly happy with the professionalisation of the nurse treating me. I have no issue with the current process.
