Subject: Consultation-Registered Medical Practitioners who provide Cosmetic Medical Surgical Procedures

I am writing this letter to you as I have been advised about the Medical Board's proposed changes to the Cosmetic Nurse who has been providing Botox Services to me over the last 16 years not being able to continue the wonderful treatments I have been receiving

In this time I have used a doctor twice to do the procedure my Nurse does and both times found them to be inferior to the treatment I receive from my nurse.

Trish Matheson has been injecting me under the supervision of a doctor for 16 years and I have been given exceptional treatments.

I have always been fully informed about all products used by Trish and what to expect each time I have been injected

Trish has always informed me of all the complications which can occur

Trish is NEVER willing to take any risks with her patients and makes sure she is informed of all medications I am taking.

The standard of her injecting is of such high standard I have no bruising after my treatments

Trish is so passionate about the work she does and regularly attends training to stay current and informed about present & future techniques.

It would be a massive disappointment to me if the proposed changes were made and vastly unfair.

I have every confidence in Trish & the doctors who supervise all procedures.

Finally I would like to close by imploring you not to make these changes as I can assure you she is the best Cosmetic Nurse I have ever encountered

Regards
Beverley [REDACTED]
