Subject: FW: No cosmetic nurse injectors. Registered medical practitioners who provide cosmetic medical and surgical procedures

To Whom it may concern,

I'm writing in regards to the Medical Board thinking of implementing 2 schedules which will mean no cosmetic nurse injectors. I have had cosmetic injections over the last couple of years. The nurse that has done this procedure has been doing for over 15 years. I have found her to be very professional each time I have had something done she sits me down has a talk about my health has there been any changes ect. She always explains fully and clearly what the cost will be the treatment plan she also discusses any complications and side effects that may happen and if so how to manage them. I have talked to a doctor a couple times in a real time video link and of course he runs through questions with me and gives me time to reply. The nurse also provides me with material about treatments. I have always felt very safe and well informed. I am a person who always ask question before I do anything I like to be well informed. Where I go is a very well respected clean and professional beauty salon. I feel nurses should be able to give treatment they have years of study and the nurse I attend is always updating her studies. I believe Doctors have enough to deal with without adding extra pressure on them when a nurse is very capable of doing these procedures. I do not like the idea of having to go to a doctors waiting room waiting for a cosmetic procedure when people around me are very sick. I hope Nurses will be able to continue these treatments. It would be a great shame if it was taken away from registered Nurses.

Regards
