Subject: Consultation- Registered medical practitioners who provide cosmetic medical and surgical procedures

To whom it may concern.

I am writing to you in regards to Trish Matheson whom has been working with us for 3 years now.

We have found Trish a very competent nurse and injector. She has worked well with our clients as well as staff within our salon.

With our experience with Trish injecting us and our feedback from our clients; We find she is very professional and makes sure that all is covered through a very thorough consultation, including the point out of contraindications and any medications that may affect treatment.

Making sure that each client knows about any side effects and things that may affect the outcome of treatment performed.

This is involving a written form of consent and also verbal discussion of treatment expectations.

Included also in the consultation would be a written treatment plan and related costs to treatments.

Trish never wishes to over perform where not necessary to the needs of the client. In turn we have found that clients always feel very comfortable with treatment pre and post.

Trish always has up to date booklet/ leaflet information on treatments that are given and comes along to our salon with all her needs to set up a healthy clean environment fit for medical procedures.

Therefore we have no hesitation of referring Trish to other salons for her services.

Kind Regards,

The logo for Serenity Face & Body features the word "Serenity" in a large, elegant, light blue script font. Below it, the words "FACE & BODY" are written in a smaller, light blue, all-caps sans-serif font.
