Subject: Consultation – registered medical practitioners who provide cosmetic medical and surgical procedures

To the medical board,

I would like to express my concerns about removing experienced cosmetic nurses like Trish Matheason and replacing them with doctors!

It will be very inconvenient to have to have a consultation with a doctor before having a treatment every time! Trish has been my nurse for a number of years and really knows me and what's she is doing! She is professional and represents exactly what is needed in the industry! She is excellent at her job (as many other cosmetic nurses will be too!) and what she/they do so well needs NOT to be replaced by a Doctors! A quick Facetime interview is all that is needed from a doctor! Doctors DO NOT need their Job!

The industry is bigger enough to have nurses and doctors practice!

Kind regard
