Robyn Barrett Roydhouse RN Div 1 Clinic: *Total Tan Watergardens Shopping Centre Taylors Lakes 3938*

I am a cosmetic nurse injector with 13 years experience. I have had considerable training in this area and for a number of years was a clinical trainer for Inamed Aesthetics for *Collagen* then for Allergan for the botulinum Botox®. My most recent clinical training position was with iNova for a bio-stimulator Sculptra. As such I have extensive experience in this specialty area of Cosmetic medicine. To undertake work for the above clinic I am a contractor for a leading service provision group *Anti Aging Associates*. This particular group prides itself on providing monthly skill and technique training for all members.

The benefits for my regional clients are bountiful in that they have access to the advice and administration of the most current and scientifically accessible treatments provided in any major city clinic. I find it is my duty to bring this skill to Gippsland to service the needs of regional clients.

My clients undergo a thorough consultation process and patient education and safety are paramount. Current and past medical histories are taken and a range of treatment regimes is discussed. Prior to any treatment regime commencing patient histories, via the modern electronic face to face communication of telemedicine are provided. *Skype* as the communication medium provides immediate **real-time** communication for my clients. They have the opportunity to raise any concerns with the doctors who are directly associated with *Anti Aging Associates*. I meet with these doctors on a monthly basis at Head Office. They know me and are aware of my appropriate experience, skill, methodology and technique.

Currently **APHRA** – Australian Health Practitioner Regulation Agency referred to as the **Medical Board of Australia** - is undertaking a review of the way cosmetic treatments are administered through Australia. The patients below have been invited to sign this petition offering frank comments as to the efficiency, safety, and medical standard of practice offered to them in this regional setting.

Thank you for considering this partition.

Robyn Barrett Roydhouse Rn Div 1 Post Grad Health Promotion.

NOTE: Skype is an accepted face to face medical telecommunication tool to assist in psychiatry, cardiology and most recently published in The Age Sunday April 12, "sleep whisperers enjoying howling success" in the area of poor sleeping patterns associated with newborns.

We support well trained cosmetic nurse injectors in their field of expertise with their existing focus on patient safety, patient education and outcome that include dual consultation with a associated *Anti Aging Associate* doctor/nurse practitioner in read time video conferencing.
