Dear Sir/Madam,

How precious life is, who has the qualification to save lives?
Who has the knowledge to know what body needs in sickness, illness, injury, even life and death?
Who has been educated for years and years studies, practice and experience?

I bet all answers is Doctor, who is the position decide what patient need when it's in sick, life and death, Doctor saves life, not save someone's belief or whatever matter, because Life is prior matter of all above, why would we change it?

Please keep the present National Doctors code of Conduct.

Sincerely
So Lai
