Bruce (age 12) says, "I want to be a girl"

Doctor thinks, "There are 37.2 trillion cells in your body."

"In humans, each cell normally contains 23 pairs of chromosomes, for a total of 46.

Twenty-two of these pairs, called autosomes, look the same in both males and females.

The 23rd pair, the sex chromosomes, differ between males and females. Females have two copies of the X chromosome, while males have one X and one Y chromosome."

Bruce says, "Big deal. I what to be a girl"

Doctor says . . . .

AMA says . . . .

---

\* Medical science: I note the AMA is generally skeptical of alternative medicine. AMA is conservative.

\* Social science: I note the AMA is generally supportive of social alternatives. AMA is "progressive".

\* Why is that so?
