Belated suggestions for Good Medical Practice, A Code of Conduct. - Apologies for late contribution as I have been away and just missed the deadline - Please consider and confirm receipt of this. Thank you.

“National Law:Summary of advertising obligations:

Advertising must not be false, misleading or deceptive, or likely to be misleading or deceptive”.

Suggested changes - Please consider expanding.

Regarding the misleading use of titles, this should be clarified further in the new Code of Conduct and include degrees and academic titles such as Associate Professor. For example, Doctors acquire titles such as “Associate Professor” for a limited time period. It is not usually permanent according to the Academic Institution and when that person is no longer in that role, it is wrong that they should continue to use the title.
