Dear Sir ... I am astounded by the changes proposed to the code. There is no true scientific / medical case backing your shift toward a compliant, softly, softly, acquiescent approach toward treating / counselling patients facing gender issues. Your attempt to threaten / silence doctors who don't toe the "anything is OK" so called "progressive" ideology is simply disgraceful ... who is influencing this charade ... certainly not the ordinary doctor who really cares about the patient ... so sad ... Hitlerite mind control for what clear cause???

Sad ... think again
