TO WHOM IT MAY CONCERN

Re: Concerns over new draft

I wish to express my concerns over Doctors having a restriction in their freedom of speech in areas like euthanasia, gender fluidity and abortions. The public and employers can be relied upon to ensure that opinions of Doctors are respectful and reasonable; and therefore legislation is not required.

Doctors have a right to freedom of religion in the above matters, especially if they think that their care of patients is compromised by and that certain actions as named above go against the Hippocratic Oath.

Yours sincerely

Susan Garry
